Hello James

That's good to know.

The full paper needs to be ready and fully done to the best of your ability.

Then I will take a final look.

So, I suggest you connect all parts to the main paper, you both read through and ensure it's ready.

Regards

Oyakhi

Sounds great, thank you!

Yes, please proceed.

Thank you, I will do that.

Dear Both,

Please find attached an example of what a published paper looks like in finance. Carefully look through it and see how it is put together.

Then put the paper you're working on in that format.

I also attached papers that we just submitted to journals. Look at them very closely. You will see how to improve the one you're working on. Take one of the papers and follow the style to produce yours.

When you're done, you will see that the new version of your paper is different from what you currently have.

Best

Oyakhi

Dear Both

Please see to it that you have thoroughly read the same papers that I sent and that you write the ongoing paper in that standard format, everything correctly done like a paper that flows and tell a particular story, just like the sample papers.

Ensure everything is neatly and well done as soon as possible or no later than next week. Once done, it would be submitted to <https://link.springer.com/journal/10693>

I want to reassign both of you to Minqi Shu, to assist with some ongoing projects

Regards

Oyakhi
